## **London Hydro Advises - Potential Traffic Delays**

London, Ontario- August 30, 2007 – London Hydro will begin work this week on Oxford Street at Wonderland Road to Platt's Lane installing new poles and conductors. This project will require a reduction to one lane in the eastbound direction Monday through Friday until the end of December 2007.

Londoners should be advised that there is the potential of traffic delays in this area and may wish to consider an alternate route until the work has been completed.
